

# System Requirements

## *Operating Systems*

- Windows 10, 8, or 7 with .NET Framework 4.6.1
- Windows Server 2016, 2012, 2008 R2 with .NET Framework 4.6.1

## *Other Programs*

[Citavi's Word Add-In](#) is an Add-In for Microsoft Word 2016, 2013, and 2010 (32 bit or 64 bit for all versions). With the Word Add-In you can insert references and quotations from your Citavi project into Word. The bibliography is generated automatically.

The LaTeX Assistant lets you insert references into the following TeX editors: Led, LyX, TeXMaker, TeXnicCenter, TeXstudio, TeXworks, WinEdt or WinShell. Using the Clipboard you can also use Citavi with online TeX editors, such as ShareLaTeX, Authorea, or Overleaf.

The [Citavi Picker](#) is an extension for your browser or PDF reader that lets you transfer information, webpages, or PDF files to your Citavi projects. The Citavi Picker browser extensions require Internet Explorer version 11 or later (32 bit or 64 bit), Firefox version 48 or later (32 bit), or Google Chrome version 30 or later. The Picker for Adobe Reader or Adobe Acrobat require version 10 or later of either program.

To log in to Citavi Account you need Internet Explorer with JavaScript enabled.

## *Memory Requirements*

Citavi projects are loaded to RAM when the project is opened. The maximum project size depends on the amount of RAM and the structure of your data (the number of authors, knowledge items, etc.) but usually is somewhere between 25,000 and 50,000 references.
