

Mnova System Requirements for the latest Mnova version

Mnova is a multiplatform software which will run alternatively on Windows, Mac OS X, Linux and Unix-like systems.

1. For latest Mnova version:

1. Windows

The minimum system requirements for a Mnova installation are the ones needed to run Windows 7 or higher. (XP is not supported anymore since Mnova v.10.0.2).

2. Mac OS X

Mnova requires Mac OS X 10.13 or higher.

3. Linux

Mnova requires at least Pentium 300 MHz, 128MB RAM, Video Adapter Super VGA (800 x 600) with X11, OpenSSL (not required from Mnova v.14.1) and OpenGL libraries.

Make sure you choose the correct setup file for your Operating System (Debian, OpenSUSE, Fedora, Ubuntu and Red Hat 6 Enterprise Linux). The minimum supported operating system is CentOS/RHEL 6.5

4. Mnova License Server

The Mnova License Server does not require higher specifications than any regular Mnova installation.

5. Mnova DB Server

A working Java runtime environment. Minimum version for all OS 1.8.
