

WirisQuizzes

by 

STEM Authoring and Assessment
Tool in Digital Learning.

Infinite resources for your STEM
Assessments with WirisQuizzes.

AVAILABLE IN YOUR LMS:

COMING SOON:

Google Classroom

WirisQuizzes speaks and understands STEM. With its powerful math engine, it can support you on each step of the way by:

- 1** Authoring STEM questions with the MathType editor and designing graphical functions with our unique graph builder.
- 2** Automatically assessing each answer provided by students, saving time to each professor.
- 3** Connecting with multiple LMS and educational platforms to make sure all your results are automatically recorded and shared accordingly.

What makes us special?

Showing students' work with our WirisQuizzes Scratch-Pad With our digital handwriting functionalities, students can easily explain their reasoning to each answer without the need to upload external documents.

Create interactive Graphical Questions Draw and share your mathematical graphs with WirisQuizzes and upload them directly to a question. Students can also answer with a graphical representation and draw functions.

Create Open Answer Questions Students can type their answers on an open field and WQ system will automatically evaluate them individually according to your validation criteria.

Mitigate cheating and re-use assessment questions With our random parameters' functionality, each student will be able to view a different question value. This not only mitigates cheating, but also promotes a unique learning experience through trial and error.
